Allowable Subject Matter

The indicated allowability of claims 7-11,15-18 is withdrawn in view of the newly discovered reference(s) to Niemeyer et al.. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-30, 33-61 are rejected under 35 U.S.C. 102(e) as being anticipated by Niemeyer et al. (6,364,888).

With respect to claims 1, 7, 15, 28,33, 37, 40, 52 Niemeyer et al disclose a master station (700) comprising a lower positioner assembly; an upper positioner assembly supported over the lower positioner assembly and rotational relative to the lower positioner assembly to enable lateral side to side surgeon manipulation; as best seen in FIGS 1A, 6A-C and as set forth in column 9, lines 5-30, an arm assembly including an elongated arm member (702) having a hand assembly (706) at its distal end for engagement by the surgeon's hand, and a proximal end pivotally supported from the upper positioner assembly to enable an orthogonal forward and back surgeon manipulation in a direction substantially orthogonal to the lateral surgeon manipulation,

Art Unit: 3732

as set forth in column 31, lines 11-67, column 32, lines 1-67; column 35, lines 1-67, column 36, lines 1-67; the assemblies being disposed remote from the slave station and to the side of the operator so that the arm member extends in a direction along at least a portion of the operator arms; as best seen in FIG.9 and as set forth in column 13, lines 48-57; one of the holder is adapted to receive a thumb and the other adapted to receive a forefinger; as set forth in column 9, lines 10-15; first, second and third pivot joints to provide motion actuation to the medical instrument; as best seen in Fig.11.

With respect to claims 2-6,8-14,16-27, 29,30,34-36, 38,39, 41-47, 53-61 Niemeyer et al disclose all the limitations, as best seen in FIGS. 1-30; and as set forth in column 9, lines 5-13, column 31, lines 11-67; column 32, lines 1-67; columns 35-36, lines 1-67.

With respect to claims 48-51, the method steps, as set forth, would have been inherently carried out in the operation of the device above.

Response to Amendment

Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claim 31 is allowed.

Conclusion
